

PRESS RELEASE

New all inclusive car storage from Ecurie Esprit

A new and innovative prestige car storage service has opened its doors in Stratford-upon-Avon, Warwickshire. Only the highest standards of care are provided to all vehicles at one simple monthly price which includes collection from any mainland UK address, installation to dedicated air chambers, continuous connection to battery conditioners and regular active maintenance regimes. The company also offers customers a fully managed service which handles all aspects of a vehicle's appearance and well-being from servicing to MOTs, repairs, refurbishments, restorations and anything in between.

Owner Tom Morrison-Jones commented "by bringing professional car storage, logistics and care services to a single point we are offering discerning clients everything they need in one place in a highly convenient way. Our philosophy is very simple, the same high standards of care for all vehicles placed in our custody at one clear and transparent price."

Located in highly secure alarmed facilities, the Ecurie Esprit service enables enthusiasts, collectors and investors to enjoy the ownership of specialist cars without the worry of providing a perfect controlled environment or the inconvenience of managing their asset's upkeep and care.

The company collects the vehicle from the client's address and delivers directly to the storage facility, with the car remaining in its care and control at all times. The vehicle is then taken through a detailed induction procedure to ensure thorough storage preparation before installation to a sealed air chamber and connection to a state-of-the-art battery conditioner. Whilst stored each vehicle is fully insured, actively maintained and regularly exercised to keep it pristine and ready for use all year round.

Clients are able to access their car directly from the storage facility itself or request delivery and return to any European address of their choosing, with the vehicle being checked and prepared before and after each usage event.
